Train For Success

FREE

refresher courses to further the learning process beyond the classroom. Once you attend a class, you can keep coming back to that same class for free. See page 3 for more details.

Viewing this on a computer, tablet, or smartphone? **CLICK** the class dates to view the class outline!!!

Computer Visions' General Policies

Students may repeat any class (version specific) taken at our facility on a space-available basis. Refresher students must bring the student manual from their original class.

Prior to the class date, the students and/or contact person will receive an email or phone call confirming attendance in the class. Please arrive 15 minutes prior to the start of class. A late arrival disrupts the class flow and interrupts learning.

If you cannot attend a class for which you hold a reservation, please notify Computer Visions.

You will receive a 100% refund if you cancel ten or more business days in advance for application classes and fifteen or more business days for technical classes (e.g. certification classes).

Remember, this open-enrollment schedule only lists the most popular classes from Microsoft, Adobe, etc. If there is a particular class you have a need for, please call us for availability. We will do our best to accommodate any and all of your training needs!

VALUE-ADDED COMPUTER TRAINING

Computer Visions works hard to consistently provide quality computer and business training. We consider every aspect of the training experience when we schedule classes. Our goal is to attain complete customer satisfaction while building strong, lasting relationships with our clients.

COMPUTER VISIONS' TECHNIQUES FOR TOTAL CUSTOMER SATISFACTION:

- 1. The Learning Process:** Learning in and beyond the classroom is the focus of Computer Visions' training. Effective classroom training provides increased Return on Investment (ROI) when learning continues outside the classroom. **Computer Visions designs its classes to facilitate continued practice, exploration and growth.**
- 2. Certified Trainers in Person:** At Computer Visions you will never walk into a classroom to be greeted by a television screen. **You will always have a real-life trainer with you in the classroom when you join us for class!** Computer Visions' trainers are not only technically proficient, but are skilled communicators. They know how to make novice users comfortable with technology and turn advanced users into "power users." Best of all, they truly make learning fun!
- 3. Quality Training Materials:** Computer Visions provides each student with a manual developed for instructor-led training. **The course materials are user-friendly and provide easy reference when needed.** Each manual includes documented concepts, hands-on activities and quick tips.
- 4. Refresher Classes:** Students can take **FREE refresher courses** to further the "beyond the classroom" learning process

with the opportunity to refresh the skills they learned in class.

- 5. Help Desk: FREE, unlimited technical support Monday through Friday.** Whether by email (vision@compvisions.com) or phone (518-437-1600), the answer to your technical or general question is right at hand.
- 6. Convenient Location:** Corporate Woods (exit 5A off I90) provides **easy access** from the Northway, the Thruway, and I-787. **The best places for lunch are only minutes away.**
- 7. Training at YOUR Location:** Computer Visions can provide its excellent training **at your location.** Effective classroom learning in familiar surroundings!
- 8. Class Size:** We ensure training integrity with small class sizes. **No gimmicks can replace personal interactions to facilitate the learning process.**
- 9. Price Matching: We will price match competitors' pricing for a private class.** Contact us to get the best pricing possible for your training needs!
- 10. Training Guarantee:** When all is said and done, **Computer Visions guarantees customer satisfaction!**

CUSTOM TRAINING OPTIONS

On-Site Training: Computer Visions will supply an expert trainer with years of training and consulting experience to your facility to train your employees. We routinely send our trainers to Buffalo, Syracuse, New York City and as far as Atlanta, Georgia and San Bernardino, California.

Custom Classes: If a class that we offer doesn't exactly fit your needs, let us customize it for your company. Whether you need an application class trimmed to a half day class, or an intensive application class that covers multiple levels in one day, we can provide the customization.

Private Classes: With a class minimum of 4 students we can arrange any training course from basic application classes to advanced networking classes.

One-on-One: Need a little extra attention on a specific application or project? A Computer Visions expert consultant will customize any of our course offerings to provide you with one-on-one training/coaching.

Remote Learning: Computer Visions launched a unique approach, leveraging key technologies to provide the full classroom experience to any remote location. Our remote instructor-led training is delivered in the standard training.

ATTENTION: GOVERNMENT AGENCIES & CONTRACTORS

COMPUTER VISIONS is a NYS certified woman owned business enterprise (WBE).

**Why is that important?
BECAUSE IT SAVES YOU TIME!**
As determined by the N.Y.S. OGS Discretionary Buying Thresholds for Consulting, Systems Integration (SI) or Training Services.

Where the projected cost for **Consulting, SI or Training** is expected to cost less than \$200,000.00

The Issuing Entity may "buy direct" from a back-drop contractor if the contractor is identified as a New York State

- **Certified minority business enterprise (MBE) and/or**
- **Certified woman owned business enterprise (WBE)**

MICROSOFT OFFICE CERTIFICATION TRAINING PACKAGE

In today's fast paced world, learning how to use computers is a necessity.

Computer Visions would like to help you get on the path to success.

First, ask yourself:

- Do you want to ensure that your computer skills meet the current demands of companies?
- Do you use Microsoft Office or Microsoft Project on a regular basis?
- Do your employees include administrative assistants, help desk staff, trainers or Microsoft Office "power users" in any department?

To help prepare you or your employees for the skills required to pass the MOS exams, Computer Visions is offering the following **MOS Certification Training Package** (valid for versions 13-16):

Microsoft Specialist Certification Training Package

Choose up to 5 of the following classes:

Word-Level 1 | Excel-Level 1 | Access-Level 1 | PowerPoint-Level 1
Word-Level 2 | Excel-Level 2 | Access-Level 2 | PowerPoint-Level 2
Word-Level 3 | Excel-Level 3 | Access-Level 3 | Intro to Windows
Total Value \$995 – Special Offer: \$750

Microsoft Master Certification Training Package

Choose up to 15 of the following classes:

Word-Level 1 | Excel-Level 1 | Access-Level 1 | PowerPoint-Level 1
Word-Level 2 | Excel-Level 2 | Access-Level 2 | PowerPoint-Level 2
Word-Level 3 | Excel-Level 3 | Access-Level 3 | Intro to Windows
Outlook-Level 1 | Project-Level 1 | Outlook-Level 2 | Project-Level 2
Total Value \$2,985 – Special Offer: \$1,950

STRATEGIC BUSINESS TRAINING

Are you interested in taking your business to the next level? Ever thought of how improving your employees' business, interpersonal, and goal setting skills could strengthen your team? Explore a wide range of strategic business training courses at Computer Visions in order to develop the skills you need to take you and your company to new heights.

Classes such as:

Google AdWords for Businesses

You will create an AdWords account, run an ad campaign, and track the performance of ads. This course is for small business owners, members of marketing departments, those seeking a career change wishing to become Google AdWords professionals, and web designers seeking to offer AdWords as an additional service to clients.

Business Writing

This course teaches students how to write in a business environment. After a review of basic writing skills, students will learn how to write business letters and reports, as well as several types of proposals.

Effective Presentations

This course teaches students about creating effective presentations. Students learn how to determine realistic presentation objectives, analyze the audience, use supporting materials effectively, organize a presentation clearly, and successfully incorporate visual aids. Course activities also cover reducing the fear of speaking, remaining calm, appearing relaxed, and improving the delivery of your presentation.

Building a Brand on Social Media

Your brand speaks for your company and its products and/or services. In today's online-focused world, it's important that your brand has a definitive, consistent, and responsive presence. Whether you're looking to build a brand from scratch, or strengthen an existing brand, this course will help you build a brand using social media. We'll cover how to build a social media strategy, identify social media platforms that fit your brand, craft strong messages that will engage your audience, and evaluate and revise your strategy.

And also...

Email Etiquette

Employee Performance

Managing Customer Service

Financial Management

Appraising Performance

COMPUTER VISIONS CONSULTING SERVICES:

NETWORK CONSULTING

Our network consulting services encompass all your networking needs, from a complete network design & installation to troubleshooting, maintenance and upgrades to general consulting. Computer Visions provides support for Microsoft, VMware, Linux, and Proprietary Systems.

Our methodology is simple: we analyze your environment and your objectives, suggest the equipment and software you need, provide you with a competitive quote, and then install and configure it. Our process provides you with a turnkey business solution.

- Knowledgeable technicians with years of on-site, hands-on experience
- Support for all popular platforms
- Provide critical network security

We offer networks customized to your specifications using quality components. We can support your current network, maintain its integrity, and also provide upgrade support as the needs arise.

With hands-on experience our staff can troubleshoot your current system and

resolve issues that might be limiting peak performance or creating security risks.

Services available:

- Consulting and Research Services
- Forensic discovery and recovery
- Professional LAN Wiring and LAN jack installation
- Setup of Small Office Networks
- Web Server setup on all Windows Server (IIS)
- Windows Server setup and configuration
- Enterprise LAN/WAN router installation & configuration
- SOHO internet gateway router installation and configuration
- Backup system hardware and software installation
- Backup software installation and configuration
- Group workstation setup to work in LAN/WAN configuration in new offices
- Desktop support for all Windows operating systems
- Firewall installation and setup
- Internal/external e-mail system setup
- General network services, computer services, & computer consulting
- Microsoft Hyper V
- VMware

1. What is Computer Forensics?

There are a number of slightly varying definitions around. Generally, computer forensics is considered to be the use of analytical and investigative techniques to identify, collect, examine and preserve evidence/information which is magnetically stored or encoded.

2. What is the objective of this?

To provide digital evidence of a specific or general activity.

3. To what ends?

A forensic investigation can be initiated for a variety of reasons. The most high profile are criminal investigations and civil litigations; but forensic techniques can be of value in a wide variety of situations, including re-tracking steps taken when data has been lost.

4. What are the common scenarios?

Wide and varied! Examples include:

- Employee internet abuse
- Unauthorized disclosure of corporate information and data (accidental and intentional)
- Industrial espionage
- Damage assessment (following an incident)
- Criminal fraud and deception cases
- General criminal cases (many criminals simply store information on computers, intentionally or unwittingly) and countless others!

5. How is a computer forensic investigation approached?

It's a detailed science. Broadly, the main phases are:

- Acquire and preserve the evidence
- Analyze the evidence
- Present computer evidence by creating a case report to document the evidence and investigation results.

For more information about computer forensics or for rate information, please contact us at (518) 437-1600.

Approximately 31% of IT projects are cancelled before completion
 Approximately 84% of all IT projects have cost overruns of at least 20%
 Approximately 86% of all IT projects have time overruns of at least 20%

Do these dismal statistics sound familiar?
 Do you want to do something about it?

If so, invest in world-class Project Management training at Computer Visions!

Classes are forming now for courses in IT Project Management; Building Project Teams; Project Planning, Scheduling and Control; Project Communications: Infrastructure and Protocol; and Project Risk Assessment and Management.

Call your Account Manager at (518) 437-1600 for more information, or to register.

WHY BECOME MICROSOFT CERTIFIED?

"I found the exam experience to be very rewarding and passing this exam allowed me to be promoted to a more senior position." - Neal M

Without question, the condition of the economy is having a fundamental impact on how companies conduct business. While organizations are looking to cut costs and reduce risks wherever possible, they're turning to IT to maximize the efficiency of their existing assets. Certification, as an industry-recognized validation of skills, is a proven differentiator—whether the individual is a seasoned IT professional looking to demonstrate his or her value to the organization, or someone who's looking to break into the industry for the first time.

Certification improves organizational performance.

A study conducted by IDC looked at the organizational performance of more than 2,000 IT teams, examining the relationship of team performance to the percentage of the team certified on a variety of technologies.

The study states:

"Unequivocally, certification, as a measure of skill, showed a positive correlation to performance improvement."

Is it relevant?

Microsoft certifications are continually updated and measured for relevance in the marketplace, so it remains an effective tool for job satisfaction and career growth. Certification training provides skills that professionals can immediately apply in a work situation. With new certifications, Microsoft has structured its training to provide the flexibility to learn the way individuals prefer.

Finally, earning certification is the key to a vibrant community of certified professionals who have access to unique Microsoft resources. Being Microsoft certified raises the credibility of a professional's skill set. Microsoft certification ensures partners can stay current on all Microsoft technologies so they can better service customers.

If you are interested in becoming Microsoft Certified in any product, please call 518-437-1600 for more information.

"I like to stay current as new technology emerges. Also, passing the exam allowed me to take on new responsibilities professionally!" - Nate S

Please note: Certification requirements are set by Microsoft and are subject to change without notice. Stay in contact with your Account Executive to always have the most current certificates information.

Computer Visions is a Microsoft Certified Partner for Learning Solutions and offers Microsoft's certified courses. All Microsoft courses are taught using Microsoft Certified Trainers and Microsoft Official Curriculums. Computer Visions has years of experience preparing students to pass the certification exams and being successful implementing Microsoft technology in the business environment.

CompTIA

Computer Visions offers CompTIA certification courses. CompTIA, a vendor-neutral organization, represents more than 8,000 computing and communications companies that outline standards in certification, e-commerce, customer service and workforce development to meet industry wide challenges.

CompTIA Certification Options

Class times are from 9:00AM to 4:30PM

A+ Certification (900 Exam Series) focuses on the skills required for entry-level PC technicians. Students learn how to install, configure, upgrade and repair PC's. The courses include instruction in computer architecture, memory, modems, printers, hard disk setup and operating system optimization.

Cost: \$2,595

July	Sept	Nov
16-20	10-14	5-9

Network+ Certification (N10-006 Exam) course includes instruction in network operating system basics, network topologies and strategies, the OSI Model, data transmission, network, transport and session layers, TCP/IP fundamentals, IP addressing, network security and network installation, maintenance and troubleshooting. **Cost: \$2,595**

July	Sept	Nov
23-27	17-21	12-16

Server+ Certification focuses on server hardware technologies, including how to install, configure, and upgrade server hardware; preventive maintenance, troubleshooting, and disaster-recovery techniques for servers. **Cost: \$2,595**

Aug	Oct	Dec
13-17	1-5	10-14

Project+ Certification is an industry-recognized credential acknowledging competency and professionalism in Project Management; including the necessary business knowledge, interpersonal skills, and project management processes required to successfully manage projects. **Cost: \$2,595**

July	Sept	Nov
9-13	24-28	26-30

IT Fundamentals is designed to help you learn more about the world of information technology (IT). It's ideal if you're considering a career in IT or if you work in an allied field that requires a broad understanding of IT. **Cost: \$1,650**

Aug	Oct	Dec
8-10	10-12	17-19

Security+ Certification is targeted at professionals with at least two years of networking experience and knowledge of TCP/IP. Focusing on general security concepts, communications security, infrastructure security, basics of cryptography and operational/organizational security. **Cost: \$2,595**

July	Sept	Nov
16-20	10-14	5-9

CTT+ Train the Trainer is for instructors who want to verify they have attained a standard of excellence in the training field. CTT+ validates the knowledge and use of tools and techniques necessary for successfully teaching in today's learning environments. **Cost: \$1,650**

Aug	Oct	Dec
20-22	15-17	12-14

Mobility+ Certification builds on your existing knowledge and experience to provide you with critical concepts related to over-the-air technologies, wireless networking, and mobile devices.

Cost: \$2,595

July	Sept	Nov
23-27	17-21	12-16

Cloud Essentials Certification focuses on the real-world issues and practical solutions of cloud computing in business and IT. It's the preferred cloud certification for business professionals. **Cost: \$1,650**

Aug	Oct	Dec
15-17	24-26	3-5
