Class Outline:

Description:

This course teaches students how to implement a SQL Server 2016 Reporting Services solution for data analysis in an organization. The course discusses how to use the Reporting Services development tools to create and manage reports and implement self-service BI solutions.

Course Outline:

Module 1: Introduction to Business Intelligence and Data Modeling

In this module students will be introduced to the key concepts in business intelligence, and the Microsoft BI product suite.

Lessons

- Introduction to business intelligence
- The Microsoft business intelligence platform
- Introduction to reporting services

Module 2: Reporting Services Data

Describe various Report Services data sources and how these are configured.

Lessons

- Data sources
- Connection strings
- Datasets
- Filters and parameters

Module 3: Implementing reports

Create reports with report designer or report builder.

Lessons

- Creating a report with the report wizard
- Creating a report
- Showing data graphically in a report

Module 4: Configuring reports

This module describes how to configure reports with report builder or report designer.

Lessons

- Implementing filters and parameters
- Implementing sorting and grouping
- Publishing a report

Module 5: Creating Mobile Reports

This module describes how to create SQL Server mobile reports.

Lessons

- Overview of SQL Server mobile reports
- Preparing data for mobile reports
- SQL Server Mobile report publisher
