Computer Visions Course Outline

Get What You Want

We offer highly customizable group training courses: desktop applications, web development, networking & operating systems, technical certification, professional development & skills, help desk.

Get It When & Where You Want It

All Computer Visions courses are available for presentation on-site or off-site for your convenience. We can roll out any combination of courses at one or more locations anywhere in the United States, according to your requirements and time table. Just let us know and we'll work with you!

Corporate Training Solutions

Corporations look to us to train their employees. Why? Because our proven training methods have increased employee proficiency and productivity. We assign one person to each of our corporate clients to ensure quality service, and we also offer extranet Web registration, management, reporting and billing for all clients. Simplicity, quality and outstanding service are our hallmarks.

Consulting Solutions

Consulting is about trust,

#2792: Implementing and Maintaining Microsoft SQL Server 2005 Integration Services

Description: This three-day instructor-led course teaches students how to implement an Integration Services solution in an organization. The course discusses how to develop, deploy, and manage Integration Services packages.

Course Outline:

Module 1: Introduction to SQL Server 2005 Integration Services

This module introduces the role that Integration Services plays in extracting, transforming, and loading data. This module also describes the tools that you can use to build and manage Integration Services solutions.

Lessons

- Overview of Integration Services Solutions
- Integration Services Tools

Lab : Using SQL Server Integration Services

- Using the Import and Export Wizard
- Running an Integration Services Package

After completing this module, students will be able to:

- Describe Integration Services solutions.
- Use Integration Services tools.

Module 2: Developing Integration Services Solutions

service and accountability. Our consulting division is one of the fastest-growing around. Why? Clients trust us to provide excellent service and expertise. Visit our [consulting section](#) for more information.

Classroom and Computer Rentals

Need space and equipment to conduct specialized presentations or classes? We can help. With our world class classrooms and state of the art projection and presentation equipment, we take care of the details so you can have a successful presentation.

This module provides an overview of the development tasks that are involved in creating an Integration Services package. After completing this module, you will be able to create a basic package.

Lessons

- Creating an Integration Services Solution
- Using Variables
- Building and Running a Solution

Lab : Implementing an Integration Services Solution

- Creating an Integration Services Project
- Implementing a Package
- Building and Running an Integration Services Project

After completing this module, students will be able to:

- Create a SQL Server Integration Services solution.
- Use variables.
- Build and run a solution.

Module 3: Implementing Control Flow

This module introduces the tasks and precedence constraints that you can use to implement control flow in an Integration Services package.

Lessons

- Control Flow Tasks
- Control Flow Precedence Constraints
- Control Flow Containers

Lab : Implementing Control Flow

- Creating a Simple Control Flow
- Configuring Precedence Constraints
- Using Containers

After completing this module, students will be able to:

- Configure control flow tasks.
- Configure control flow precedence constraints.
- Configure control flow containers.

Module 4: Implementing Data Flow

This module describes the data flow sources, transformations, and destinations that you can use to implement a data flow task in an Integration Services control flow. It also explains how to use data flow paths to direct valid and invalid rows through the data flow.

Lessons

- Data Flow Sources and Destinations
- Data Flow Transformations
- Data Flow Paths

Lab : Implementing Data Flows

- Transferring Data
- Implementing Transformations
- Using Data Viewers
- Configuring Error Output

After completing this module, students will be able to:

- Implement data flow sources and destinations.
- Implement data flow transformations.
- Implement data flow paths.

Module 5: Implementing Logging

This module discusses how to use logging in an Integration Services package, and explains how to configure and use logging providers to generate information about a package's execution.

Lessons

- Overview of Integration Services Logging
- Implementing Logging

Lab : Implementing Logging

- Configuring Logging
- Implementing Custom Logging

After completing this module, students will be able to:

- Describe Integration Services logging.
- Implement logging.

Module 6: Debugging and Error Handling

This module describes how to debug Integration Services packages

by using the debugging tools in Business Intelligence Development Studio. It then explains how to implement error-handling logic in an Integration Services package.

Lessons

- Debugging a Package
- Implementing Error Handling

Lab : Debugging and Error Handling

- Debugging a Package
- Implementing Error Handling
- Controlling Failure Behavior

After completing this module, students will be able to:

- Debug a package.
- Implement error handling.

Module 7: Implementing Checkpoints and Transactions

This module explains what checkpoints are and how to implement them. It then discusses transactions, and describes how you can implement transactional data access logic in an Integration Services package.

Lessons

- Implementing Checkpoints
- Implementing Transactions

Lab : Implementing Checkpoints and Transactions

- Implementing Checkpoints in a Package
- Implementing Transactions in a Package
- Implementing a Native Transaction

After completing this module, students will be able to:

- Implement checkpoints.
- Implement transactions.

Module 8: Deploying Packages

This module discusses how to create Package Configurations and how to deploy Integration Services packages to production servers.

Lessons

- Package Configurations
- Deploying Packages

Lab : Deploying Integration Services Packages

- Creating a Package Configuration
- Preparing a Package for Deployment
- Deploying a Package

After completing this module, students will be able to:

- Implement package configurations.
- Deploy packages.

Module 9: Managing and Securing Packages

This module describes the management tasks that relate to Integration Services packages and explains how to perform those tasks by using the Integration Services management tools. It also describes how to secure Integration Services packages.

Lessons

- Managing Packages
- Securing Packages

Lab : Managing and Securing Packages

- Importing a Package
- Configuring and Executing a Package
- Scheduling a Package

Securing a Package

After completing this module, students will be able to:

- Manage packages.
- Secure packages.
