Class Outline:

Description:

This course builds on the fundamentals taught in Acrobat X Pro: Basic. Students will learn how to produce high-quality PDF documents for press. They will learn how to discover geospatial data in a PDF map. They will learn prepress techniques including color management, proofing and converting colors, color separations, managing inks, trapping, and transparency flattening. Students will use the Preflight feature to test and convert a document to comply with print provider requirements or ISO 9000 standards such as PDF/X, PDF/A, or PDF/E. Students will learn to create interactive forms using both the Form Editor as well as LiveCycle Designer ES2. They will learn to distribute PDF documents and forms, and to compile form data returned from users.

Table Of Contents:

Unit 1: High-quality PDFs

Topic A: PDF generation methods

Topic B: PDF file attributes

Topic C: PDF settings

Topic D: Geospatial data

Unit 2: Color management

Topic A: Color management basics

Topic B: Color management workflow

Topic C: Soft-proofing colors

Topic D: Converting colors

Unit 3: Color separations

Topic A: Color separation setup

Topic B: Separations preview

Topic C: Ink Manager

Topic D: Trapping

Topic E: Transparency flattening

Topic F: Printing color separations

Unit 4: Preflight and validation

Topic A: Print problems

Topic B: Preflight profiles

Topic C: Preflight reports

Topic D: Preflight droplets

Topic E: Validation and conversion

Unit 5: Interactive PDF forms

Topic A: Forms and LiveCycle Designer ES2

Topic B: Creating a form

Topic C: Working with form fields

Topic D: Modifying a form

Topic E: Testing a form

Unit 6: PDF distribution and management

Topic A: PDF distribution

Topic B: Form management
